Warsaw

SUMMARY

Dedicated Front-End Developer with a solid foundation in creating dynamic, user-friendly web interfaces using Angular and React. Known for a problem-solving mindset and a commitment to developing responsive and intuitive user experiences. Skilled in bridging the gap between technical and non-technical stakeholders, enhancing project quality, and fostering team collaboration.

EXPERIENCE

02/2023 - 09/2023

Full-Stack Developer
TSKB ↗

- Assumed responsibilities of a departing Senior Developer in a critical web development project, integrating Angular and .NET. Contributed to a 15% increase in feature deployment efficiency and a 20% reduction in bug resolution time, exceeding project objectives.
- Facilitated stakeholder communications and requirement gathering, improving project requirement accuracy by 25%, ensuring alignment with stakeholder expectations, and enhancing client satisfaction.
- Led the migration and redesign of legacy SQL databases, optimizing data structures and queries to improve database responsiveness by 30% and reliability by 35%, significantly aiding in data-driven decision-making.
